The advantages of Toppan Travel Service's MICE

We will ensure that your business event is a success.

"One-stop" service

By integrating everything from initial planning to venue selection, event operation, management of participants, and accounts settlement, **we reduce your event workload and its impact on your normal operations.**

Creation of business event value

We create events that motivate participants and lead to new business opportunities. Thus, our business events do not stop simply with "attendance" but actually **spur participants to take the next step.**

Travel business

Applying the know-how cultivated since entering the travel industry in 1961, we propose the best routes and venues for **generating excitement among participants.**

Examples of past accomplishments

Incentive Travel

Location: Bangkok
Participants: 150

We were involved in the consulting, from site selection with onsite surveys. We even created a sense of luxury by booking an entire floor for a party.

Anniversary event

Location: Kobe
Participants: 4,000

We coordinated everything from the venue proposal, accommodation and transport arrangements, and the management of participants.

Inbound tourism

Location: Japan
Participants: 150

We coordinated with the Ministry of Economy, Trade and Industry to highlight local areas and attract foreign visitors to Japan, with the goal of stimulating the economy and revitalizing local industries for post-disaster reconstruction.
